EDUCATION

University of California, Davis

*B.S **Statistics (Data Science Track),** Minors in **Computer Science** and **Technology Management*** *Aug 2020 - Dec 2024*

EXPERIENCE

Chief Technology Officer & Co-founder Feb 2025 – Present

ServiceAgent *San Francisco, CA*

- Launched and led a 5-person team to develop the MVP for an AI- powered interview and candidate ranking platform, delivering a working product from 0 to 1 within a compressed 3-month timeline
- Engineered a strategic pivot to a hybrid SaaS and AI Consulting model for SMBs, generating $1.2M annual run rate (ARR) within the first 30 days after launch and securing $150K in seed-stage investment interest
- Architected entire codebase and infrastructure using TypeScript, Vite, PostgreSQL, Stripe API and OpenAI API and built custom NLP pipelines with integrated video interviewing API for real-time video/audio capture, transcription and analysis
- Orchestrated product roadmap and facilitated weekly cross-functional meetings with clients while collaborating directly with the CEO to execute GTM strategy, translating high-level goals into technical milestones via Agile and Scrum methodologies

Machine Learning Engineer Jun 2024 – Apr 2025

UC Davis School of Veterinary Medicine *Davis, CA*

- Designed and maintained robust data pipelines using Python and PostgreSQL to streamline data integration and cleaning across clinical datasets, resulting in improved data retrieval efficiency and enhanced dataset quality.
- Applied statistical methods such as time series analysis and machine learning models, achieving up to 83% accuracy in predictive models, to identify key trends and patterns in data to provide actionable insights for ongoing research studies
- Incorporated AI into multiple clinical projects by leveraging Scikit-learn, Tensorflow, and OpenCV to reduce analysis time by 27% and a 25% increase in accuracy in patient prediction outcomes

Data Research Analyst Intern Apr 2023 – Feb 2024

UC Davis Department of Neurobiology *Davis, CA*

- Cleaned, processed and analyzed over 7 million data points using R and Python, delivering actionable insights that directly contributed to a 20% increase in funding by encouraging more data-driven decision making for stakeholders
- Designed, implemented, and optimized databases using SQL and MongoDB to streamline databases management for sensitive research data to help improve outdated data collection tools which reduced latency by 32%
- Presented data-driven recommendations via interactive dashboards using R-Shiny and Plotly to school board members

Software Developer Nov 2023 – Jun 2024

Google Developer Student Clubs @ UC Davis *Davis, CA*

- Led backend infrastructure design for an interview preparation app, improving system throughput by 20% through API optimization by using PostgreSQL, AWS and Open AI API
- Designed frontend components using React, enhancing user experience and decreasing latency by 30%
- Leveraged MongoDB for efficient database management and collaborated with stakeholders to gather requirements, align on data models, and ensure the system met business objectives

Marketing Data Analyst Intern Feb 2023 – Jun 2023

TRACT *San Francisco, CA*

- Devised and executed a targeted social media marketing campaign by analyzing customer segmentation insights in R-Studio and Excel which increased engagement rates, CTR, and overall impressions by 143% on LinkedIn and Twitter in one month
- Conducted A/B testing for SEO optimization with compelling CTAs, utilizing machine learning tools like SciKit-Learn and Tensorflow to analyze performance and predict the success of future marketing campaigns

PROJECTS

Stock Market Prediction Bot | *Python, MongoDB, Matplotlib, Pandas, Numpy, Seaborn, SciKit-Learn, R, ggplot2, yfinance*

- Compared Echo State Networks (ESNs), ARIMA, Linear Regression and Random Forest algorithms to predict future stock prices based on past data sourced from Yahoo Finance with a 76% accuracy rate

Netflix Customer Churn Analysis | *Python, R, Pandas, Numpy, SciKit-Learn, Tensorflow, Excel, Keras, SQL, Hadoop*

- Analyzed Netflix customer data to improve customer segmentation and predict churn with 70% accuracy for future users

SKILLS

Software: Git | AWS | Azure | Docker | MongoDB | Vite | Jira | Figma | MATLAB | Tableau | Airflow | Microsoft Office | Supabase | Kubernetes | R Studio | Postman

Frameworks: Express.js | Node.js | Tensorflow | React | Next.js | PyTorch | SciKit – Learn | Keras | Tailwind CSS | Flask

Languages: Python | R | SQL | JavaScript | TypeScript | HTML | CSS

AWARDS & ADDITIONAL INVOLVEMENTS

Deloitte Leadership, Allyship, and Mentorship (DLAMP) Scholar

UC Davis College of Letters and Science Dean's Honors List
